PROFESSIONAL SUMMARY

I am a Computer Science graduate with a strong interest in IT Support, Data, AI, Cybersecurity, and Digital operations. My experience spans customer support, administrative assistance, data entry, data analysis, and working with digital tools, giving me the ability to understand both the technical side of a task and the people who depend on it. I am always willing to learn, give attention to detail, and improve my ability to adapt across different roles while maintaining a strong sense of responsibility and professionalism.

I seek various opportunities to build a solid career in the tech space, particularly in areas where I can combine data, problem-solving, customer experience, security and technology to improve how businesses work, which would enable me to gain meaningful experience, work on real problems, learn from experienced teams, and continuously develop into a professional who can be trusted with both responsibilities and results.

EDUCATIONAL BACKGROUND

- **Michael Okpara University of Agriculture, Umudike, Abia State** **2022 -2026**
Bachelor of Science, Computer Science
